Fostering good health through world-class
pharma product solutions

Sunrise Enterprise is your one-stop destination for all of your **PHARMACEUTICAL LABORATORY NEEDS**. We offer a comprehensive selection of scientific instruments, laboratory consumables and other products to help you achieve the best results. Our team of professionals are experienced in chromatography, turnkey projects and more so you can be sure that you're getting the best quality products and services. With competitive prices and a wide selection of products, Sunrise Enterprise is the perfect choice for all of your laboratory needs.

Building a diversified
global pharma products solutions

Customer Satisfaction

We prioritize your satisfaction by offering customized services that meet your unique needs, ensuring a personalized experience.

One-Stop Destination

From expert advice to tailored solutions, we are here to fulfill your needs and simplify your journey.

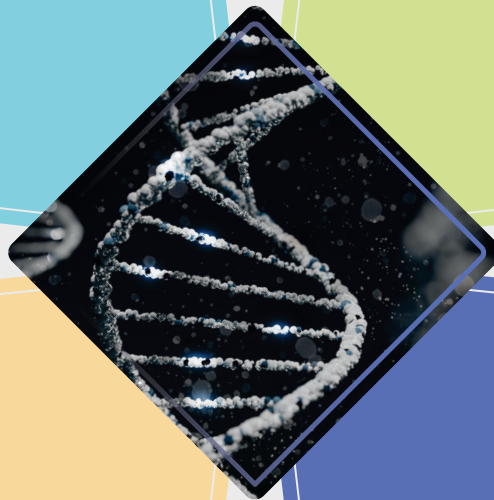

Customer-Centric Solutions

Our solutions revolve around your needs and preferences, ensuring customer satisfaction beyond expectations

**End-to-End
Supply Chain Excellence**

Experience seamless supply chain management, from sourcing to delivery, ensuring reliable and efficient operations.

TRUST DELIVERED

Our Lab Consumable

Collection range was created for you as an easy choice of essential labware, with a wide selection of quality products that keep your lab running efficiently and effectively.

Bottles

HPDE, PP, PE, glass amber bottles etc. Narrow or wide mouth with tamper-evident seal and screw, snap or dropper caps/closures.

Carboys

Ideal for storage and dispensing of water and other solutions, also media in the lab.

Centrifuge Tubes

PS, PP or PTFE centrifuge tubes, non sterile or sterile, DNase-, RNase-, pyrogen- and TSE-/BSE-free options; available in racks and bags.

Cryogenic Vials

Cryogenic vials for the storage of biological material, human or animal cells at temperatures as low as -196 °C.

Filtration

Filter papers, syringe filters, bottle-top filters etc for chemistry, chromatography and life science filtration.

Microcentrifuge Tubes

Snap-cap and screw cap microcentrifuge tubes from 0,5 to 2,0 ml in a variety of colours.

Microscope Slides & Coverslips

Microscope slides and cover slips/glasses for basic biology teaching to healthcare diagnostics.

Petri Dishes

Gamma irradiated, sterile or aseptic PS dishes in a variety of sizes and formats.

Pipette Tips

Whatever your pipette tip need, We have a product that will suit you.

Pipettes, Pasteur / Serological

Plastic or glass transfer/pasteur and serological pipettes in a variety of volumes, formats and packs.

Reservoirs

Our reagent reservoirs - great for multi-channel work.

LABORATORY CONSUMABLES

BIO-RAD

Chromatography Consumables

Expect easy-to-use, reliable, and innovative products to solve your chromatographic analysis challenges.

SPE & SLE products

SOLA SPE products are designed for bioanalytical and clinical research analysts who are tasked with providing high quality analytical results from complex biological samples in a high throughput environment, while complying with strict legislation.

Syringes & Filters

Choose from a variety of syringe filter sizes, membranes and housings for a wide range of laboratory applications.

HPLC & GC Columns

We have a column for that!

Digest Kits

SMART Digest kits improve workflows by quickly and efficiently digesting proteins for characterization and quantitation applications, due to the heat-stable immobilized trypsin design.

Manifold & Accessories

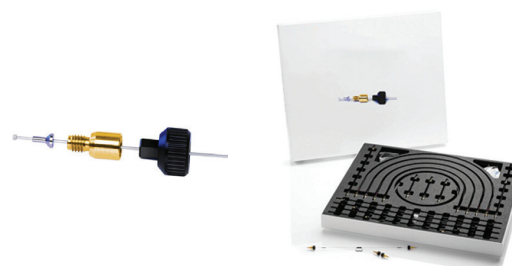

Process your samples in SPE cartridges or 96-well plates by using the flexible Thermo Scientific HyperSep® Universal vacuum manifold. The manifold is supplied with a base and vacuum gauge, flask and stopper tubing and spigots.

Vials, Caps & Septa

With our range of Vials, Caps and Septa we ensure that no HPLC/UHPLC or GC Systems gets left behind. Our Vials and well plates are suitable for standard instruments from all vendors, streamlining and simplifying your stockroom- and your budget.

HPLC Parts & Accessories

Sunrise provides various guard columns / cartridges for analytical, semi-preparative and preparative columns to efficiently extend column lifetimes.

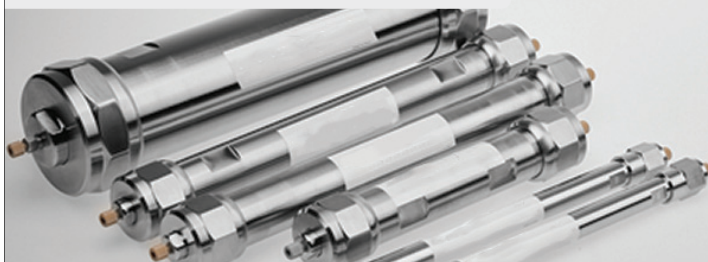

Separation with Success Better Separation Through Innovation, Quality and Service.

HPLC Columns

HPLC columns, consisting of reversed-phase (RP), normal phase (NP) / hydrophilic interaction (HILIC), ion exchange (IEX) and application-specific columns, are designed for a broad range of applications in pharmaceutical, chemical, environmental, food & beverage, research, etc.

Preparative LC Columns

Sunrise provides a selection of semi-preparative columns and preparative columns for easy scale-up from analytical scales. Various stationary phases are available for both small-molecule and large-molecule separations.

GC Columns

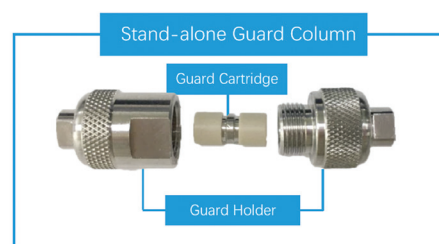

Sunrise GC Column product line includes polysiloxane phases, polyethylene glycol phases, porous-layer-open tubular (PLOT) phases, low column bleed or MS (Mass Spec) grade columns and custom-made columns.

Bio-Separation Columns

Bio Separation Columns are designed for characterization of proteins by liquid chromatography, including fast titer analysis of monoclonal antibodies (mAb) and Fc fusion proteins, monomer and dimers of mAbs, charged variant and oxidation variant analysis, antibody drug conjugate analysis, intact mAb and mAb fragments analysis, peptide mapping and glycan analysis.

Guard Columns

Sunrise provides various guard columns / cartridges for analytical, semi-preparative and preparative columns to efficiently extend column lifetimes.

Chiral Columns

Chiral HPLC columns for analytical and semi-preparative purification applications, based on unique silica matrix with monodispersed particle size and large pore morphology.

Column Accessories

- Uniguard Direct-Connection Guard Cartridge Holders
- Guard Holder and Coupler
- UHPLC filters and other accessories...

Filter with Finesse

Trust in the Range of Premium Filtration Solutions

Reagent & Solvent Inlet Filters

Protect your HPLC system from contamination with our range of Reagent & Solvent Inlet Filters. The flat design ensures efficient draw. They are made from 100% PEEK polymer and include two 10µm filters.

Columns Frits & Filters

Sunrise offers an optimal way to filter your solvents, preventing pump cavitation and system damage. We offer different style filters for specific system specifications. We have a complete line of HPLC frits for both analytical columns, semi-preparative and preparative columns.

Process Filtration / Cartridge Filters

We offer a full range of filtration & purification solutions pre-assembled to meet your process requirements like Sterile Filtration, Virus Filtration, Cell Harvesting, Prefiltration, Cell Culture Media Filtration, Air / Gas Filtration, etc

Lab Filtrations & Purification

Trust in the Range of Premium Filtration Solutions

Syringe Filters

Our syringe filters provide top-quality, reliable filtration with highest surface areas.

Clarification Filters

Lab devices enable single-step filtration without the need for centrifugation or pre-filtration.

Ultrafiltration

Our widest range of state-of-the-art lab-based ultrafiltration devices are used for molecular concentration and separation in research and clinical diagnostics.

Membrane Filters

Wide variety of microporous membranes especially designed, developed and manufactured to meet differing needs in the biotechnology industry.

Glass & Quartz Microfiber Filters

Specialized filter matrices offer highly-versatile, fast-flowing and chemically robust filtration for a wide range of demanding applications.

Syringeless Filters

The manually operated Syringeless Filtration System, consisting of a station and filter units, provides a smart and simple fix for the demanding HPLC process.

In-line Filters

Our laboratory pressure-driven filtration units are ready-to-use devices designed for the clarification and / or sterile filtration of media and aqueous solutions.

Lab Chromatography

Centrifugal filtration | Membrane Adsorbers.

Filters & Blotting Papers

Choose from more than 100 filter, blotting and technical papers engineered for specific applications and manufacturers to ISO 9001 and ISO 14001 standards.

Essential Tools, Extraordinary Science

Upscale Excellence with Lab Essentials

Lab Essentials & Sampling Tools

Vaccum Dessiccators

- Quick & convenient checking of the vacuum levels

Venting Wash Bottles

- Colour coded for easy identification

Powder Spatulas Tools

- Rounded handle makes it easy to hold

HDPE Disposable Bags

- Autoclavable at 121° C

Crucibles with Covers

- Made up of porcelain

Powder Lance Tools

- Ergonomic, inert HDPE sampler

Lab Spatulas

- Wont scratch or mark delicate surfaces

Scoops

- Gamma sterilized & Individually sealed

Buffer Solution

Fluid Control Perfected

Superior Storage Bottles and Chromatography Consumables for Lab

Monitoring strips

- Monitor the number of autoclave cycles upto 40

Sticky Mats

- Easy to use peel away sticky mats

Sterile Media Bottles

- PET bottles with HDPE caps
- Light-weight PS bottles

Storage Bottles

- Ideal for general laboratory use
- Autoclavable

PolyPropylene Bottles

- Offers excellent chemical resistance
- Heavy metal free

HDPE & LDPE Bottles

- HDPEs are translucent and more rigid than LDPE
- LDPEs offer better content visibility than HDPE

Sunrise **pipettes and pipette tips** raise your pipetting to a whole new level ensuring repeatable and reliable results.

9IR INNOVATIONS

Quality, customisation, and speed are some of the hallmarks that differentiate our laboratory chemicals business from its competition, making us one of the leading lab chemical suppliers in this space.

AR/ACS

A wide range of analytical reagents that meet and exceed the ACS specification prescribed in APHA, ASTM, US EPA methods & USP monographs.

Analytical Reagent (AR)

AR (Analytical Reagent) grade chemicals offered by us conform to the highest international standards. These products are manufactured to suit the requirement of analytical, research laboratories and manufacturing of speciality chemicals and Pharmaceuticals products.

AR Dry Solvents

These Solvents are ideally used for chemical reactions where water traces inhibit or lead to side reaction and generate unwanted products. These solvents are suitable for various applications in chemical analysis, synthesis and purification.

Extra Pure

Our Extra Pure reagents are used in laboratories for basic analytical applications, qualitative analysis, organic synthesis and manufacturing of API, agrochemical and speciality chemicals.

Electronic Grade (EL)

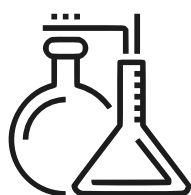

Semiconductor and solar photovoltaic cells manufacturing need high quality chemicals, which ensure high performance of semiconductor devices and high efficiency of photovoltaic cells, our range of reagents suit to these application.

For Microscopy

Stains can enhance and improve the visibility of the components in cells and tissues under investigation and used in Histology, Cytology and Haematology laboratories. These stains meet the highest quality standards and give excellent colour performance of desired components of cells and tissue in life science laboratories.

For Synthesis

Building blocks, specific reagents for acetylation, alkylation, reduction and oxidation etc in board range of specification suitable for chemical synthesis.

Gradient HPLC

Acetonitrile and Methanol HPLC Gradient solvents are purified with advance purification technology which remove impurities interfering in Gradient HPLC analysis.

Quality, customisation, and speed are some of the hallmarks that differentiate our laboratory chemicals business from its competition, making us one of the leading lab chemical suppliers in this space.

GC Grade Solvents

GC solvents are produced to meet the stringent demands of capillary gas chromatography. Developed & tested especially for the application in residue analysis of pesticides and other low-volatile substances using GC.

GC-HS

GC-HS technique is used in identification and quantification of residual solvents in pharmaceutical products as per national and international Pharmacopoeia. Our GC HS solvents free from volatile impurities which could interfere in GC HS analysis.

High Purity Acids Tracepura

Trace metals are tested on ICP-MS to address regulatory requirements. Suitable for Food, Environment & Pharmaceutical sample analysis. Available in 500 ml & 1 Litre packs

HPLC & Spectroscopy

We offer a number of Polar and Non Polar HPLC and spectroscopy solvents. These solvents are purified with multistep purification techniques and packed in a controlled environment to offer consistent performance in HPLC and spectroscopy analysis.

HPLC Buffer and Ion Pair Reagent

To address your total HPLC Reagent requirements in drug analysis, biopharma research and environment analysis, we offer you HPLC grade acids, bases, buffer salts and Ion pair reagent in addition to HPLC solvents to ensure consistent performance in your analysis.

Indicators

To have accuracy at end point in volumetric analysis, we offer a range of reagents suitable as Indicators in various titration like acid base titration, redox titration, Iodometric and Iodimetric titration, complexometric and precipitation titration. These indicators are sensitive to small change in pH, change in potential or metal ion concentration.

Karl Fischer Reagent

Karl Fischer reagents are used in the analysis of water content in raw material and finished products in food, pharmaceutical, chemicals and oil industries.

pH Indicator Papers & Test Papers

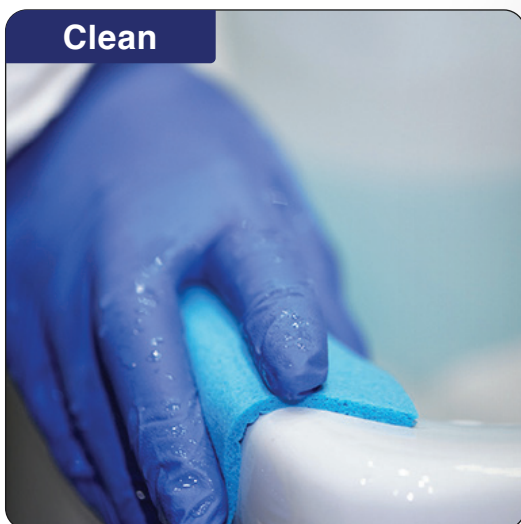

pH indicator papers are used to monitor the pH of soil, waste water samples in the field, manufacturing processes of textile, leather, pigment and Dyes instantly.

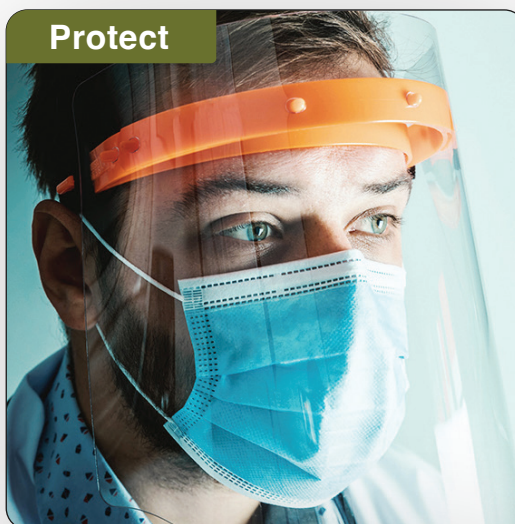

Sunrise Enterprise provides the crucial facilities, finest solutions, and expertise to ensure your cleanroom exceeds the prescribed industry standards.

Documents

- Excellent products from **Class 10 to Class 100,000**.
- **cGMP compliant**, quality standard tested products with thorough documentation.
- Providing comfort along with quality and protection.

Protect your staff, yourself and your space with our choice of trusted equipment and apparel which is designed to help reduce exposure to workplace hazards and injuries.

PRODUCTION SUPPLIES

Cleanroom Face Masks

Flat face and duck-billed masks, sterile or non-sterile.

Cleanroom Gloves

Gloves and fingercoats to protect both operators and sensitive products from contamination.

Cleanroom Paper

Cleanroom-compatible paper, notebooks and other writing materials.

Cleanroom Tapes

Adhesive cleanroom tapes are suitable for colour marking and sealing.

Clothing

Sterile cleanroom garments and non-sterile single use labcoats and coveralls.

Goggles

Autoclavable or sterile goggles for cleanroom use.

Mops

For easy cleaning in controlled environments.

Swabs

Swabs in all shapes, sizes and materials.

Wipers

Sterile, dry and pre-wetted wipes.

Protect your staff, yourself and your space with our choice of trusted equipment and apparel which is designed to help reduce exposure to workplace hazards and injuries.

SAFETY PRODUCTS

Lab Coats

Ladies or mens cotton / polycotton coats.

Face Masks

Particle filtering masks.

Respirators

Disposable filtering half masks.

Gloves

Nitrile, latex and vinyl gloves.

Soap Dispensers

Hand, elbow or touchless operation.

Footwear

Protect your feet.

Eye Protection

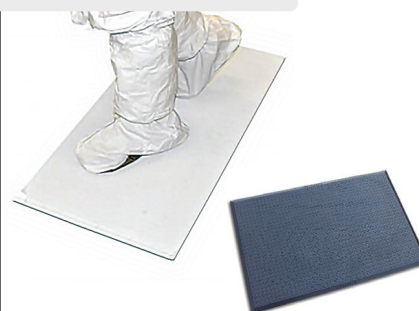

Sight protection from goggles and safety glasses.

Lens Cleaning Tissues

Gentle, effective cleaning of all optics including glasses.

Mats

Comfort and safety underfoot.

SAFETY PRODUCTS

Protect your staff, yourself and your space with our choice of trusted equipment and apparel which is designed to help reduce exposure to workplace hazards and injuries.

Radiation Control

Beta radiation bins and shields.

Bottle Carriers

Contains bottle breakages.

Safety Labels

Sticky GHS symbols.

Spill Control

Absorbents, spill collection and neutralisation.

Fire Blankets

Put out small lab fires.

Biohazard Bags

For disposal of biologically hazardous waste.

Incinerator cartoon

Sturdy boxes for collecting broken laboratory glass.

Bench Protection

Protects working area.

Safety First, Always Protecting Your Lab with Our Safety Products

LABORATORY EQUIPMENTS

Because your samples are precious, our laboratory equipment is designed to deliver unwavering performance

Autoclaves

VWR VAPOUR-Line bench top and free-standing autoclaves.

Benchtop Centrifuges

Refrigerated/ambient centrifuges, 0,2 - 750 ml, swingout speeds around 4000 min⁻¹, fixed angle over 30 000.

Block Heaters

Analogue and digital block heaters and thermomixers.

Circulators / Thermostats

Baths, controllers, thermostats and circulators/recirculators, heating and cooling.

Homogenisers / Blenders

Blenders, homogenisers and grinders for sample preparation.

Hotplates

Stainless steel and ceramic hotplates.

Freezers

ULT upright and chest freezers.

Microcentrifuges

Ambient and refrigerated microcentrifuges from 0,2 to 2 ml tubes up to 17 000 xg RCF.

PRECISE MEASURING TOOLS

Whether you're working in a research laboratory, hospital, or electronics facility, Sunrise offers the right tools for your accuracy needs – with the added choice of calibration services!

Balances

Micro, analytical, top pan and moisture determination balances.

Conductivity Meters

Measuring tools for conductivity, salinity and TDS.

Dissolved Oxygen Meters

Robust units for bench and field work with precise optical sensors to measure % and ppm dissolved oxygen.

Air Samplers

A complete system for microbiological environmental air monitoring.

Bottle-top Dispensers

Precise dispensing from reagent bottles to bottle-top burettes for titration.

Data Loggers

Precise and accurate recording of temperature, humidity and pressure, etc, over time.

Microscopes

Upright and stereoscopic microscopes, including the VisiScope range, accessories and image-capture tools.

Barrier Isolators

Switzerland based SKAN AG are globally known for their range of Isolators with integrated Hydrogen Peroxide decontamination system. **We represent SKAN AG in India for their complete range.**

Process Equipments

Pharmaceutical Process equipments is equipment used in chemical and material processing for manufacturing pharmaceutical products. The machines and equipment that we manufacture is usually designed with a specific process or family of processes which can also be customized for a particular facility in some cases. API PLANT EQUIPMENTS LIQUID ORAL PLANTS INJECTABLE PLANTS (SMALL VOLUME) PARENTERALS PLANTS (LARGE VOLUME) OINTMENT AND CREAM PLANT SOFT GELATIN PLANT PRESSURE VESSELS FERMENTERS CIP SIP SYSTEMS.

Filtration Systems

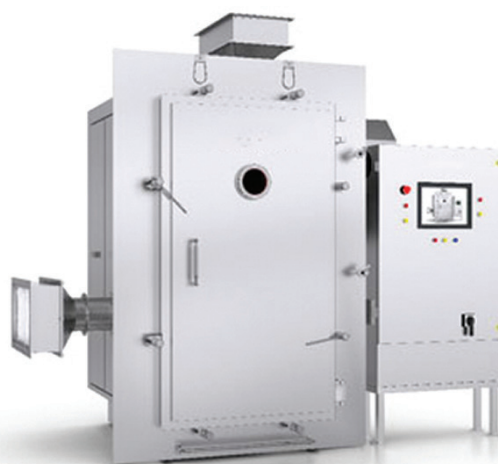

We have been into the liquid filtration equipment market for over 30 years. Our strength lies in the process know-how wherein providing solutions rather than filtration equipment is of benefit to the user. VERTICAL PLATE FILTER PRESS PP FILTER PRESS FOR CORROSIVE LIQUIDS HORIZONTAL PLATE FILTER PRESS AUTO CAKE DISCHARGE FILTER.

Packaging

We have dedicated its engineering capabilities and expertise for developing high speed machines to meet the industry needs. The supply of machines is supported by a strong technical team for installation of the machines as well as training of the operating staff. **This includes products like :** AIRJET CLEANING MACHINE ROTARY BOTTLE WASHING MACHINE LINEAR BOTTLE WASHING MACHINES SEMI-AUTOMATIC AUTOMATIC LIQUID FILLING MACHINE (LINEAR) MONOBLOCK FILLING AND SEALING MACHINE SEMI-AUTOMATIC CAPPING MACHINE STICKER LABELLING AUTOMATIC CARTONING MACHINE TUBE FILLING MACHINE AUTOMATIC COLLATION & SHRINK WRAPPING MACHINE.

Tray Dryer

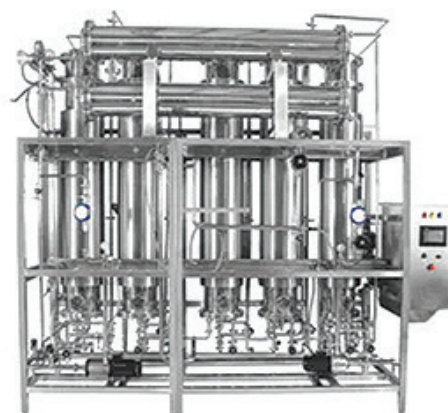

Drying is vital in manufacturing solid products for Pharmaceutical, chemical, specialty chemical, food processing, and other industries. Achieving desired dryness while maintaining product quality is critical to the technology used for drying. **Tray driers are well-known for achieving the highest possible dryness of critical products while maintaining product quality.**

MASTER PLANNING

- A Master Plan also called a comprehensive plan, provides a long- term vision for the built environment of Pharmaceutical Factories and Laboratories. It guides the appropriate use of lands in order to plan and envisage future growth potential. As a result, the Master Plan has a direct relationship with the growth of the organization.

CONCEPT ENGINEERING

- Concept Engineering will be a crucial document to decide the project plan and will be a base document for Detailed Engineering. This involves the initial conceptualization of the entire project which helps in forming the foundation on which the rest of the project is built up.

DETAILED ENGINEERING

- Process Engineering including selection of the right equipment
- Electrical Engineering
- HVAC
- Instrumentation
- Building Management and Automation Systems
- Preparation of Detailed Specifications, Data Sheets and Bill of Quantities for various Plants, Equipment, Machinery and System
- Supply of various Plant Equipment, Machinery and Systems.

PROJECT MANAGEMENT

- Project management in our field of operations consists of the application of knowledge, abilities, tools and techniques which enables us to complete project activities in order to satisfy customer requirements and thus accomplish the final goal with efficacy and efficiency.

REGULATORY COMPLIANCE SUPPORT

I. ADVISORY SERVICES

cGMP (Current Good Manufacturing Practice) Compliance Advisory services to queries pertaining to Pharma GMP, GLP, QA and Regulatory Affairs Compliance audits as per current and updated statutory pharma regulations Gap Analysis Technical Due diligence for Mergers & Acquisitions.

II. TECHNICAL ASSISTANCE

Site Master Use as per PIC/s & Local FDA requirement Quantitative Risk and Assessment (QRA) Environment Impact Assessment (EIA) Safety Audits Energy Audits.

TECHNOLOGY TRANSFER

- Our team of multi-functional life science consultants have proven success in managing product and process transfers for our clients.
- Our team will demonstrate how to transfer your product or process in the most efficient manner possible, ensuring compliance along the entire way.
